-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 April 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Art Unit: 3654

Applicant's election without traverse of the species of figs. 1-7, claims 1-10 and 18, in the reply filed on 9/22/05 has been acknowledged.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Said subject matter is "the guide pathway reversing in direction in the transition segment...during rotation of the device."

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Harrison et al (US-6511009). Note elongated barrel comprising primary and secondary winding surfaces/areas 305 and 307, "flange wall" 107, and guide pathway 103 having the claimed transition segment.

Art Unit: 3654

Claims 6, 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harrison et al (US-6511009) in view of Pierro et al (US-5908172). That the barrel/primary winding area such as 305 includes first and second parts securable to each other as shown by Pierro et al would have been obvious to a person having ordinary skill in the art to facilitate manufacturing and/or repair and maintenance.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Harrison et al (US-6511009) in view of Edmonston et al (US-4387863). Edmonston et al shows another similar winding device having two flange walls and two auxiliary winding areas with respective guide pathways. It would have been obvious to a person having ordinary skill in the art to provide the apparatus of Harrison et al with two flange walls and two auxiliary winding areas as taught by Edmonston et al so that both ends of the wire/cable are accessible or to provide convenient winding in both directions.

Claims 2-5, 8, 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 18-24 are allowed.

Applicant's arguments filed 4/25/06 have been fully considered but they are not persuasive.

Art Unit: 3654

The S-shaped pathway of Harrison et al connects the first and second circumferential pathways which are, analogously, the primary and auxiliary winding surfaces. Therefore, the claim is anticipated.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

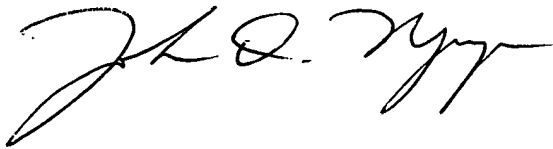

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Q. Nguyen whose telephone number is (571) 272-6952. The examiner can normally be reached on Monday-Thursday, from 7:00 AM to 4:30 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Katherine Matecki, can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
